

An App for UT SUREWalk — the Volunteer Side

Daisy Pinaroc, Jennifer Walker,
Ryan Cabrera, Zach Eagan

SUREWalk Hub

01

Motivation

Why does a volunteer app for SURE Walk matter?

Motivation

SURE Walk:

- Is a UT Austin service
- Enables students to request a SURE Walk to safely get home after staying on campus late
 - Also provides car rides
 - Volunteers help students get back home

But...

- Students currently have to physically show up at Jester Center to sign up to volunteer
- Volunteering process for UT Austin's SURE Walk system is confusing and not very well known

was unaware that people
could volunteer for
SUREwalk

- respondent 3

Daisy Pinaroc

doesn't know how to sign
up to be SUREwalker

- respondent 3

Daisy Pinaroc

Pain Points

01

Lack of SURE Walk Exposure in Student Body

- Not fully aware of SUREWalk services
- Participants don't know much about the process to be a volunteer

02

Volunteering Process is Confusing

- Doing volunteer-related tasks (Registering, Scheduling Shifts, Accepting Walks, etc.) is confusing for a prospective volunteer
- How to do tasks is not "clear" enough for a prospective volunteer

trust themselves more
than a stranger walking
them home

-respondant 5

Zachary Justin Eagan

trust in the person they're
with is a reason they've
never used a surewalk

-respondent 2

Jennifer Walker

Pain Points

03

Limited Trust

- Lack of trust between SURE Walk volunteer and requester
- Not much information available about volunteer

walks around campus at
night roughly 3 times a
week

-respondant 5

Zachary Justin Eagan

said there should be more
security in areas just
outside of campus

-respondent 1

Jennifer Walker

The Need for a SUREWalk App

Active Campus

All participants said they are
out on campus at night

Campus Safety is a must

Potential volunteers shared
safety concerns regarding
areas around UT campus

User Wants

said it would be beneficial for volunteers to be able to see a profile of the person they would be walking with for their own safety

-respondent 2

Jennifer Walker

app should have check in and check out process for SUREwalk volunteers

- respondent 3

Daisy Pinaroc

said app should ask volunteer for day availability

- respondent 3

Daisy Pinaroc

Easy to stop and start volunteering

-respondant 6

Zachary Justin Eagan

said volunteer app should allow students to register for specific shifts

-respondent 1

Jennifer Walker

said ideal volunteer app would include interesting facts about the user so volunteers could start conversation with student

-respondent 2

Jennifer Walker

03

Problem Statement

?

?

?

Problem Statement

The current SUREwalk volunteering process is hard and many participants did not know what SUREWalk is

Needs a better system to allow for students to get home safely at night

Goal: Create an easier process for volunteers to sign up, check-in, etc. by creating an app

04

Personas

https://www.123rf.com/photo_28971387_happy-indian-college-student-leaning-against-wall.html

Jasmine

Demographic

21, Junior @ UT Austin,
Public relations major,
Chicago, IL

Goals

Create a safe environment
Expand SUREWalk name
Build resume

Needs

See who is volunteering
See who she'll be walking
Ability to walk with friend

<https://www.istockphoto.com/photos/male-college-students>

Andy

Demographic

19, Freshman @ UT Austin,
Arts & Entertainment Tech
major, El Paso, TX

Goals

Build up service hours
Help create a safe community
Help classmates

Needs

Easy to use
Track hours
Build trust with users

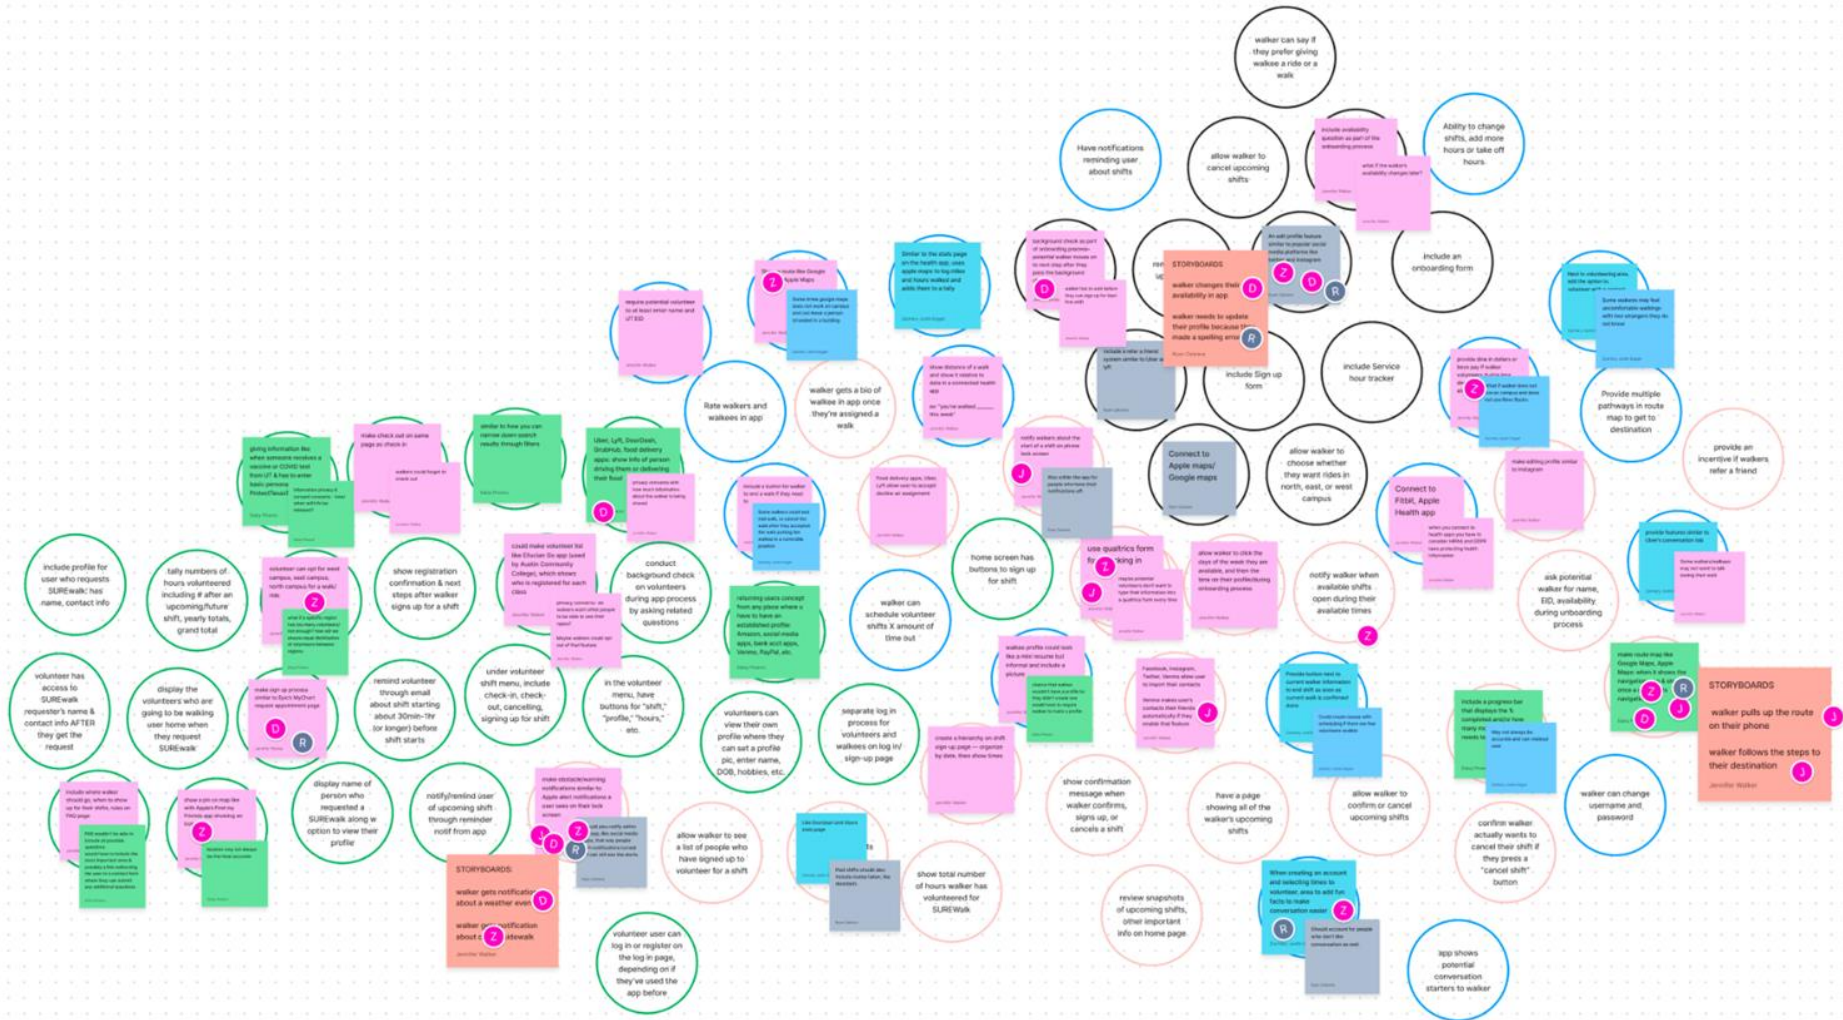

05

Ideation

Thinking about the
solutions SUREWalk
Hub will provide

<https://pngset.com/download-free-png-nykef>

make route map like Google Maps, Apple Maps: when it shows the navigation on & str once a u ts navigatio

Daisy P

STORYBOARDS

walker pulls up the route on their phone

walker follows the steps to their destination

Jennifer Walker

er can change
ername and

Solution for lack of directions with current system

provide dine in dollars or bevo pay if walker volunteers during less desirable hours (about 12 pm)

nifer Walker

What if walker does not live on campus and does not use Bevo Bucks

Zachary Justin Eagan

STORYBOARDS

walker changes their availability in app

walker needs to update their profile because they made a spelling error

Ryan Cabrera

An edit profile feature similar to popular social media platforms like twitter and Instagram

Ryan Cabrera

include Sign up

Suggestion for building trust with profiles

Providing incentives (service hour tracking)

06

Design Concept

Design Rationales

Potential volunteers want:

- Identification
- Flexibility
- Confirmations/feedback
- Incentives/service hour tracking

said if they were able to see a profile of the person they would walk with they would feel more comfortable using surewalk

-respondent 2

Jennifer Walker

said app should ask volunteer for day availability

- respondent 3

Daisy Pinaroc

said app should send volunteer confirmations of shifts, signups, etc.

- respondent 3

Daisy Pinaroc

Tracks hours volunteered and makes it easy to schedule times

-respondant 6

Zachary Justin Eagan

Design Concept

SUREWalk Hub will:

Potential volunteers will be able to:

- Raise awareness of SUREWalk's volunteer opportunities among student body
 - Organize volunteer process
 - Build trust in the SUREWalk program
-
- Sign-up, sign-in for shifts
 - Switch, cancel shifts
 - Search for directions through map
 - Track service hours
 - See if shifts are full
 - View profile of student they are picking up
 - Choose which walks they want to accept

Key Features

01

Onboarding/
Profile

02

Scheduling

03

Map

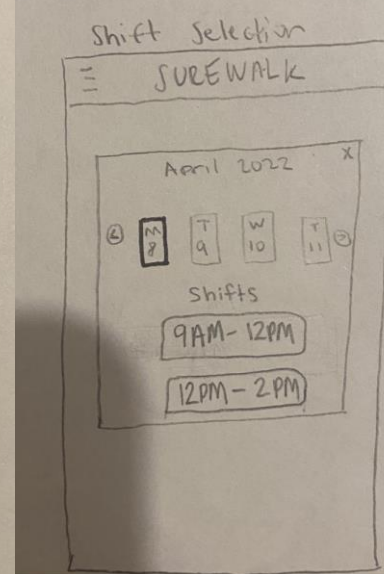

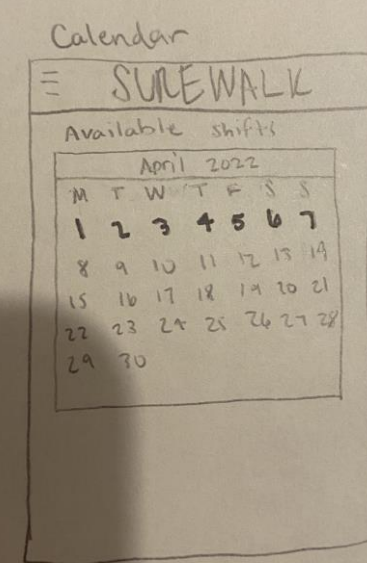

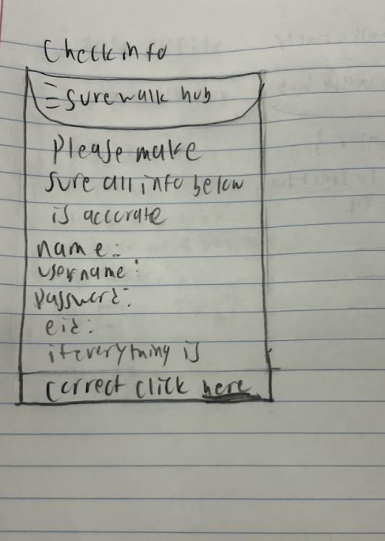

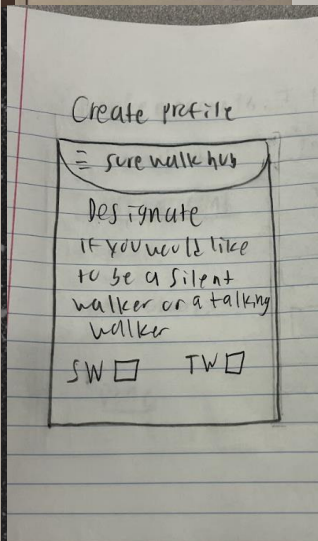

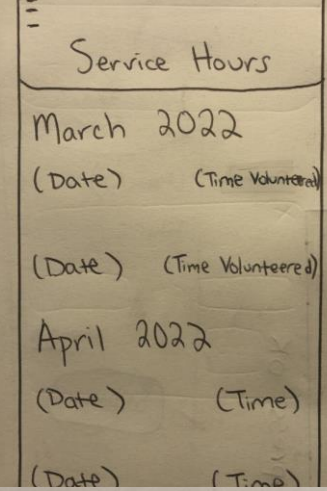

04

Service Hour
Tracking

Exit feature

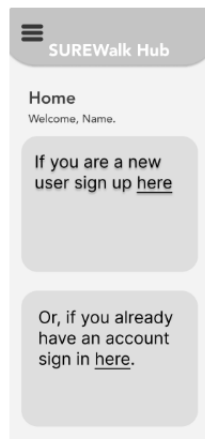

#1: The SUREWalk Hub app must provide adequate user feedback.

The onboarding/profile feature sends the user back to the same page they started at after going through sign-in/sign-up, not providing feedback to a user that they've completed the task.

Priority

| Critical | Severe | Major | Minor | Positive |
|----------|--------|-------|-------|----------|
| 1 | 2 | 3 | 4 | 5 |

The onboarding/profile feature needs improvement in its user feedback.

Findings

EVIDENCE: After a user goes through the sign-in/sign-up process, the page directs them back to the same home page that says to sign in or sign up again.

- **Frequency:** This happens to every user.
- **Impact:** A user might get confused as to why the home page doesn't change after they go through the onboarding process and have moderate difficulty after those tasks. If they realize they're signed up/in, they can press the hamburger menu, and the user might still be able to achieve their goals. Some of our participants hesitated after performing tasks with this page but were still able to complete the tasks.
- **Persistence:** The problem happens every time someone signs in/signs up from the app. The onboarding/profile feature does not provide feedback to the user.

Recommendations

Solution: Have the onboarding/profile feature direct to a new home page after sign-up/sign-in.

Trade-Off: Adding a few frames for clarity should not take long and is worth the time for the best user experience.

#3: Some links are missing in the scheduling feature.

Participants could not cancel/swap shifts because there are no buttons for them to navigate to those pages.

Priority

| Critical | Severe | Major | Minor | Positive |
|----------|--------|-------|-------|----------|
| 1 | 2 | 3 | 4 | 5 |

Once participants navigated to the available shifts page, they became stuck.

Findings

Evidence: When asked to cancel and switch a shift, participants could find the scheduling feature. But from this point, there is no button on the available shifts page to view upcoming shifts.

- **Frequency:** All participants encountered this problem.
- **Impact:** This problem is difficult for users to overcome because there is no way for them to get to the pages to cancel/swap shifts.
- **Persistence:** This will repeatedly become a problem unless fixed by designers.

Recommendations

Solution: Our team needs to add an “Upcoming Shifts” button so users can find future pages.

Trade-Off: It should not take long for our team to add a button to the prototype.

10

Next Steps

Check-in/out process

app should have check in
and check out process for
SUREwalk volunteers

- respondent 3

Daisy Pinaroc

Reminders about shifts

app should send
volunteers reminders
about shift

- respondent 3

Daisy Pinaroc

Obstacle alerts

allow volunteers to keep
track of the neighborhood
and possible dangers,
“obstacles” in
neighborhood in order to
increase their safety &
allow them to plan
accordingly and work
around it

-respondent 4

Daisy Pinaroc
